What is a lm75 feed frame?

The feed frame is available in two sizes to suit a variety of operating conditions. The LM75 features a load sensing hydraulic system, proportional controls, a fail-safe rod clamp, built-in troubleshooting and a spooling device. These features make the LM75 a highly reliable drill when drilling in harsh conditions.

Does the lm75 have a rod handler?

An optional patented rod handler can be added to the LM75, which greatly increases driller safety. The rod handler makes loading rods easier and ensures they remain away from moving parts during rod tripping. The LM75 is capable of both wireline and conventional coring. **1.
