

Low headroom drill rigs

ad Room 1 7 4 3 2 The Soilmec LHR quick conversion kit is specially designed for works in low space condition, under the electric power lines or bridges, as well as existing structures. Drill ...

Micropile Drill Rig Keller selects the drilling rig and construction procedure for each micropile project based on site access constraints and the subsurface conditions. In open access sites, ...

Our newest piling rig is versatile, compact and one of the best in its class for low headroom projects. Only 1.85m wide and 4m long, weighing in ...

The Short mast version of our Kelly bar cylinder crowd machines are ideal for drilling with an overhead restriction. Drilling under power lines, existing bridges on inside a ...

Low headroom micropile/anchor drill rig Has ran 10 " casing deep with dual clamps Switch heads and drive hollow bar with drifter attachment Unit comes ...

The Soilmec R312 200 is a compact yet powerful hydraulic drilling rig designed for versatile foundation applications, including bored piles, CFA piles, and soil ...

The brand new SM-11 is a versatile, compact and powerful machine. The rig is fitted with proportional, hydraulic servo-assisted controls that make the operations smooth and trouble ...

The Tescar TT7 is an advanced compact rotary rig engineered for multipurpose drilling modes. Created with compact dimensions and innovative features, this ...

These drill rigs will help you get into tight and low overhead room locations, while performing at the highest function. Our drill rigs are made with quality and application in mind, ...

The MAIT HR 130 standard with low head room is a powerful, compact drilling rig that does not require disassembly for transporting from job to job.

Description The HR260 is one of the most popular rig in its range. This rig reflects the result of all MAIT philosophy: powerful, reliable, low maintenance. Multipurpose rig Patented Upper ...

Do you need to drill next to a building with a major boundary? Is there a low roof blocking access to large machinery? Not a problem--with our low headroom piling rig we can major site ...

The Marini MR - P350 is a compact rig engineered for bored piles and low headroom (LHR) drilling, offering

Low headroom drill rigs

efficient performance in confined spaces, particularly in urban construction.

The reasons are simple: low headroom small rotary drilling machines are more cost-effective and offer quicker returns on investment. Besides, with urbanization expanding, ...

The Comacchio drilling rigs can be configured for single, double and triple fluid jet grouting, satisfying the most varied needs. Our offering ranges from compact models sized to work ...

QLD Civil Solutions is your go-to provider in Brisbane and across Australia for low clearance drill rig services, offering specialised solutions for projects with limited headroom. Our fleet features ...

Low headroom small drilling rigs, such as those manufactured by X-Borer, are indispensable tools for projects in confined, challenging environments. Whether you're reinforcing foundations in ...

TEI TD 100 Drill Rig Fitted with the new TE 1000 drifter which can generate 10,000 ft. lbs. of torque and is designed for the larger hollow bars such as 76 and 103mm This unit has a 10" ...

Belpile are industry leaders in limited access and restricted headroom piling applications, having completed a number of large projects across Australia. ...

A low headroom rotary drilling rig is a specialized type of drilling equipment that can operate in areas with limited overhead clearance. It is commonly used in various industries and ...

With their compact footprints and low-headroom configurations, Tescar rigs allow crews to drill in narrow corridors, alleyways, and sidewalks without shutting down surrounding ...

The Comacchio drilling rigs can be configured for single, double and triple fluid jet grouting, satisfying the most varied needs. Our offering ranges from ...

Low headroom rigs can be employed under bridges, under buildings, or underneath power cables. The rig choice will depend on the insitu soils, weight or headroom restriction pile depth and ...

The Low Head Room (LHR) Piling technology is used when the drilling operator is required to drill large diameter piles in restricted access job sites. Special ...

Advanced technology and flexibility The SR-45 has become well known for its characteristics of dynamism and drilling capabilities combined with quick and efficient mobilization for rapid start ...
