

Manages deepwater drilling rigs

On floating rigs such as moored semisubmersibles and dynamically positioned drill ships, the kit required to practice CBHP, PMCD and RFC-HSE variations has evolved to include several ...

Having pioneered the industry's first complete deepwater MPD integrated solution, we lead the pack by offering a robust, efficient, fully integrated and ...

Drilling rigs are essential machines used in various industries to create holes in the earth's surface. From oil and gas exploration to water well drilling and ...

Seadrill is an expert in Managed Pressure Drilling (MPD) and has drilled over 100 MPD wells globally. MPD is an advanced drilling technique used to precisely ...

We can analyze, plan, and execute MPD programs while working with and training your personnel--both offshore and on land. In addition, specialized ...

Type of Drilling Rigs Drilling rigs come in various designs to suit different operational needs. Each rig type is tailored for specific environments and ...

Riser Analysis Drilling riser, subsea components and well casing are subject to stresses that depend on several factors, most notably the environmental forces acting on the riser (current ...

Participates in the general maintenance of a drilling rig. Receives directions from the Driller and overall supervision from the Rig Manager.

FAQ: Offshore Drilling Companies 1. What is the difference between jack-up rigs and drillships? Jack-up rigs are fixed platforms suitable for shallow waters (up to ~400 ft), ...

As a Chevron wells manager, Ross recently participated in the most complex task of his 35-year career: helping bring a first-of-its-kind drillship to action. Called Deepwater Titan, the ...

An industry first The Schlumberger MPD integrated solution is the industry's first complete deepwater MPD solution, from reservoir to flare stack, available from a single supplier and ...

Discover the basics of well drilling rigs with this beginner's guide. Learn how they work, key components, and their role in water well and mining ...

An industry first The Schlumberger MPD integrated solution is the industry's first complete deepwater MPD

Manages deepwater drilling rigs

solution, from reservoir to flare stack, available from ...

As the deepwater prospects today address ever more complex conditions, so the drilling industry has adjusted its technology to address operational obstacles. The least obvious bottleneck is ...

Managed Pressure Drilling (MPD) is an advanced technique designed to address the challenges associated with drilling in high-pressure, high-temperature ...

Vantage Drilling International is an offshore drilling contractor that operates and manages a fleet of modern, high specification drilling rigs on a worldwide ...

Drilling in subsea formations that require precise pressure balancing to maintain well bore integrity leads to a need for integrating safe and reliable Managed Pressure Drilling technologies that ...

Deepwater drilling is the process of creating holes in the Earth's crust using a drilling rig under deep water. The purpose is to explore for and produce oil and natural gas ...

Transocean has been the clear leader in this arena with the arrival of its eighth-generation drillships the Deepwater Atlas and the Deepwater ...

The collaboration between Halliburton and Oil States will provide operators and drilling contractors with an effective and flexible MPD product ...

Unlock the secrets of water well drilling rigs! Learn about their components, operation, and how to choose the right one for your needs.

The Right Fleet Transocean is constantly evaluating the sophistication and marketability of our rigs in order to maintain our position as the industry's ...

Abstract Ultra-deepwater drilling has revolutionized offshore oil and gas exploration, enabling access to hydrocarbon reserves at unprecedented depths. Technological advancements in ...

Nick oversees the MPD business line at Stena Drilling, the Swedish maritime company that manages five high-spec deepwater drill­ships ...

Now that the business model is well established, rig contractors are more independent at the time of operating the systems available in the market, getting proactive at the time of developing ...
