

Marini drill rig

What is a Marini drill rig?

Marini drill rigs excel in tasks that require precision, such as installing micropiles, anchors, and soil nails. Their versatility allows operators to adapt to different project requirements, ensuring accuracy and efficiency in every drilling operation.

What makes Marini different from other drilling machines?

Hard to reach areas that require special articulation of the drilling machine are what make Marini stand out against other drilling manufacturers. Marini Quarries Group designs and manufactures machines for applications in geotechnical, micropile, and rock drilling projects.

What is a Marini MR - 5 PN drilling rig?

Marini MR - 5 PN pneumatic drilling rig with hydraulic power pack, is patented for drilling on linear or slightly inclined work surfaces. Can be equipped with rotary head and separate roto-percussion drifter. SPECIFICATIONS Max. Clamp Passage

What is Marini MR - 3 hydraulic drilling rig?

Marini MR - 3 hydraulic drilling rig with hydraulic power pack, is patented for drilling on linear work surfaces. Born primarily for the coring sector, it is however also suitable for rotary head and separate roto-percussion drifter. SPECIFICATIONS Max. Clamp Passage

What is Marini MR - 2 pn pneumatic drilling rig?

Marini MR - 2 PN pneumatic drilling rig is used on very inclined work surfaces. Can be equipped with a rotary head or a separate roto-percussion drifter. SPECIFICATIONS Max. Clamp Passage
Marini MR - 2 ID Hydraulic drilling rig, complete with power pack, is used on very inclined work surfaces.

What is Marini MR - 5 id hydraulic drilling unit?

Marini MR - 5 ID hydraulic drilling unit with hydraulic power pack, is patented for drilling on linear work surfaces. Can be equipped with rotary head and separate roto-percussion drifter SPECIFICATIONS Max. Clamp Passage

Marini drill rigs excel in tasks that require precision, such as installing micropiles, anchors, and soil nails. Their versatility allows operators to adapt to different project requirements, ensuring ...

The MR--C 95 radio-controlled track-mounted drill rig's design has a single-section arm and double-turn table system. Both allow for the most flexibility ...

Marini MR - 5 PN pneumatic drilling rig with hydraulic power pack, is patented for drilling on linear or slightly inclined work surfaces. Can be equipped with rotary head and separate roto ...

Marini drill rig

Hydraulic Rock Drills Furukawa and Marini build strong, high performance rock drills for all forms of rock drilling: quarries, open pit mining, civil and ...

The VOYAGER is a mobile drilling unit with rubber tracks for drilling horizontal, vertical or inclined holes driven by a hydraulic power unit with a diesel engine ...

Marini MR-3 The MR-3 is the ideal machine to explore the subsoil and carry out core boring on different ground consistencies in any drilling direction. It allows assessing the material ...

MR-2 PN Portable Drilling Rig The MR-2 PN is a portable pneumatic drilling rig able to operate on slope and steep terrain. Its tubular structure with wide base ...

Marini MR-3 The MR-3 is the ideal machine to explore the subsoil and carry out core boring on different ground consistencies in any drilling direction. It allows ...

Marini drilling machines are synonymous with reliability and long-lasting performance. Each machine is designed to withstand the toughest conditions, ensuring high performance even in ...

Browse a wide selection of new and used MARINI Vertical Drills for sale near you at MachineryTrader . Top models include MR-C 10, MR-C 15, MR-C 50, ...

The know-how acquired in over 45 years of professional growth and the extensive assistance network make Marini Quarries Group the ideal partner to supply a single machine or an entire ...

The MR-C 95 is currently the largest unit in the crawler drilling rig range. With an operating weight of up to 24 tons, this unit offers unmatched power, stability, ...

Hard to reach areas that require special articulation of the drilling machine are what make Marini stand out against other drilling manufacturers. Marini Quarries Group designs and ...

Company Profile Your Global Partner We imagine, design and build Marini Srl is a global leader in the design and manufacture of state-of-the-art diamond wire drilling and cutting machines and ...

Marini Quarries Group offers an extensive selection of equipment tailored to diverse needs. The machines, designed and crafted for applications in civil ...

The MR-C 90 radio-controlled hydraulic track mounted drilling rig, designed with a double section arm, allows you to make horizontal, vertical, inclined, and ...

The unit DRILLER is an ideal pneumatic drilling machine to execute the holes for diamond wire passing. It is

Marini drill rig

equipped with a rotating head and a down-the-hole hammer that allows to reach ...

The Marini MR - P350 is a compact rig engineered for bored piles and low headroom (LHR) drilling, offering efficient performance in confined spaces, particularly in urban construction.
