

Md6250 drill rig

What is a md6250 blasthole drill used for?

The Cat MD6250 blasthole drill produces 152-250 mm (6-9.8 in) diameter holes used for explosive charges at mines or quarries.

What is a md6250 drill?

Designed to drill holes from 165-250 mm (6.5-9.875 in) in diameter, the MD6250 is optimized for single-pass or multi-pass drilling in both rotary and down-the-hole drilling modes. Thanks to electronic control strategies, reduced engine RPM and lower idle speeds

What is a cat md6250?

From the Ground Up. Productive From the Ground Down The Cat MD6250 is built from the ground up with 100% Cat parts to help you get the most out of your operation. With built-in autonomous features and the option to integrate Cat MineStar (TM) technologies, the MD6250 offers accurate, reliable performance in any drilling application.

How deep can a md6250 drill a hole?

Drilling modes include rotary for soft rock and down-the-hole (DTH) for hard rock. Single-pass hole depth with standard mast is 11.2 m (36.7 ft); maximum multi-pass hole depth is 53.8 m (176.7 feet). The MD6250 will operate efficiently at virtually all temperatures and elevations.

How does md6250 work?

MD6250 is optimized for single-pass or multi-pass drilling, in both Rotary and DTH drilling modes. With the compressors variable volume control, the operator can limit air output and engine speed both resulting in reduced fuel consumption. All of these compressors contain this feature.

What are the features of a drilling machine?

Optimal feed force, rotational torque, and air intake reduce fuel consumption. Drill Assist functionality, incorporating automatic leveling, automatic jacks, automatic raising and lowering of the mast, and automatic drilling. Monitoring the health and performance of the machine allows for productivity optimization.
