

Micheals drilling rig

Who is Michels Pipe Services?

In 2004, Michels took a giant leap into the competitive CIPP market by acquiring a well-established CIPP business, Gelco Services, Salem, Ore. The company was then re-branded as Michels Pipe Services and has become a stalwart in the CIPP industry, taking on challenging and complicated projects and winning industry accolades in the process.

Who is Michels trenchless?

Discover Michels Trenchless new installation and pipeline rehabilitation solutions. Michels Trenchless has decades of experience extending the limits of horizontal directional drilling (HDD) by working together, knowing what has already been accomplished, and taking existing techniques to the next level.

Does Michels trenchless do guided auger boring?

When extreme precision or long distances are required, Michels Trenchless completes guided auger boring by combining traditional auger boring with pilot tube systems or our HDD guidance systems.

Why did Dale Michels create Michels Pipeline construction?

When Dale Michels created Michels Pipeline Construction in 1959, he wanted it to embody one simple philosophy: Work hard and take care of your customers and you'll be successful. Now 50 years later, not much has changed -- except the size and scope of the operation that Dale modestly started is exponentially larger than when he hung out his shingle.

What types of construction methods does Michels trenchless use?

Michels Trenchless prides itself in trenchless construction methods such as Direct Pipe, horizontal directional drilling, HDD and microtunneling.

What makes Michels a great utility construction company?

Now known around the world as Michels, the utility construction company has carved out an impeccable reputation for itself with its customers, as well as its competitors by continuing to listen to Dale and his wise business teachings: Work hard and take care of your customers.
