What is a cylinder head in an air compressor?

As the name implies, a cylinder head sits at the top (head) of an air compressor pump. Its purpose is to route air through the compressor and to dissipate heat. Although it is uncommon for a cylinder head to deteriorate with normal use, damage from accidental impacts (such as dropping the unit) would necessitate replacement.

What is the function of a compressor head?

The compressor head is one of the vital components of your compressor and the part that drives the entire mechanism. When it comes to the repair of this key piece, trust high-quality products and experienced technicians, like those at Compressed Air Systems.
