

Pacific santa ana drilling rig

How deep can a Pacific Santa Ana drill?

The Pacific Santa Ana is capable of operating in water depths of up to 12,000 feet and drilling wells 40,000 feet deep. Dual Gradient Drilling is the solution to how to mitigate the negative affects of the hydrostatic pressure found within the drilling riser while drilling in deep water,one that has been highly supported Chevron.

What is Pacific Drilling's newest drillship?
