

Parker drilling rig 202

How big is Parker Drilling Company's rig?

Standing 156 feet tall, not including a tattered American flag flapping atop the mast, Parker Drilling Company's rig has some impressive credentials. The \$12 million rig weighs about 5 million pounds. It is capable of drilling 10 miles into the earth's crust.

How many rigs does Parker have?

Parker maintains a fleet of 75 international land rigs, 15 U.S. deep gas land rigs, 34 barge rigs, seven platform rigs, seven offshore jackup rigs, and specialized rental tools that it leases to other drilling companies.

Who is Parker Drilling Company?

Parker Drilling Company has become the dominant operator in the heli-rig market, operating 80 percent of all rigs transportable by helicopter to otherwise inaccessible desert, jungle, and mountain locations. It is also a specialist in deep well, arctic, and geothermal drilling. A Company Committed to Innovation Since 1934

Where were Parker rigs built?

The draw works, which powers the rig, and other machinery parts were built at the Parker subsidiary Oil Industry Manufacturing and Engineering in Odessa, Texas. The substructure and mast were built at another Parker subsidiary, Parco in Del City, Okla.
