

Parker drilling rig elk city

When was Parker Drilling Rig 114 built?

Built in the 1960s to drill experimental wells for nuclear testing, Parker Drilling Rig No. 114, was placed on display in 1991 to welcome visitors to Elk City, Oklahoma, and has been refurbished several times. 2003 photo by Bruce Wells.

What is Parker Drilling 114?

Parker Drilling No. 114's story began in 1969 when the Tulsa-based company signed a contract with the U.S. Atomic Energy Commission to drill a series of holes up to 120 inches in diameter and 6,500 feet in depth in Alaska and Nevada for experimental tests. The advanced drilling rig and two sister rigs were built to drill atomic wells.

Which oil rig is most valuable in Oklahoma?

Two years later, natural gas passed oil as the most valuable energy commodity in Oklahoma. In western Oklahoma, another towering rig has a noteworthy oil patch history. With one of the tallest masts in the world, the 180-foot Parker Drilling Company Rig No. 114 has attracted Elk City tourists since 1991.

Did giant Oklahoma rigs drill in the 1970s?

Giant Oklahoma rigs drilled to record depths in the 1970s. The Anadarko Basin, extending more than 50,000 square miles across west-central Oklahoma and the Texas Panhandle, includes some of the most prolific U.S. natural gas reserves -- and a 1974 drilling record.
