What is a geotechnical drill rig?

Geomachine's geotechnical drill rigs are designed to operate in difficult soil and challenging terrain conditions. Due to their versatility, they are suitable for a wide variety of geotechnical and geological drilling. Our geotechnical drill rig range is the largest on the market.

What is a Geoprobe &#174; geotechnical drilling rig?

Complete your geotechnical investigation faster, easier, and safer when using a Geoprobe &#174; geotechnical drilling rig. The low impact and maneuverability of the geotechnical drilling rigs allow for free movement on geotechnical investigation sites with limited access, such as next to foundations, inside buildings, or under power lines.

Can Comacchio Geo rigs be used for rotary drilling?

Comacchio GEO line rigs can adapt to virtually any rotary drilling application, as well as rotary percussion drilling techniques, in all geological formations. Moreover, our GEO rigs can be configured for Sonic drilling for ground investigations in challenging ground conditions. Typically, our geotechnical site investigation equipment is used to:

Are geotechnical drilling rigs a good idea?

The low impact and maneuverability of the geotechnical drilling rigs allow for free movement on geotechnical investigation sites with limited access, such as next to foundations, inside buildings, or under power lines. But don't be fooled by the small footprint.

Why should you invest in Geoprobe&#174; geotechnical drill rigs?

Engineered with easy, fast, safe geotech sampling in mind, investing in Geoprobe&#174; geotechnical drill rigs launches your geotechnical drilling production and profit ahead. Don't see a feature you're looking for on your geotechnical drill rigs? Give us a call

What is a rotary drill rig used for?

The larger units in the range can also be used to perform rotary drilling (with either direct or reverse mud circulation) and DTH drilling for water well construction projects and ground source heat pump systems (geothermal drilling).

Geotechnical Drilling Capabilities Tierra owns and operates one of the largest and modern geotechnical drilling operations in the State of Florida. Tierra's drilling ...

Simplify geotechnical investigations using rigs engineered for efficiency with their centerline head side shift, comfortable truck options, and off-road capabilities ...

We offer high-performance drill rigs for sale, including water well drilling rigs ideal for Dubai's terrain. Built for durability, easy maintenance, and optimal productivity across geotechnical and ...

It is specified to be capable of the very highest quality geotechnical drilling, coring, sampling and in situ testing to a depth of 120 meters penetration below the seabed, in depths to 3,000 meters.

Gregg Drilling is a leading expert in marine drilling and geotechnical investigation. We own and operate an extensive array of over water platforms and marine testing equipment allowing us ...

Geoprobe's 3135GT drill rig has 10,000 ft-lb of torque and 1,000 rpm to power through your geotechnical projects whether they need augering, ...

These rigs are operated by experienced drillers who utilize a variety of drilling methodologies to meet the client's objectives. Our drilling companies strive to ...

Drilling rigs are essential machines used in various industries to create holes in the earth's surface. From oil and gas exploration to water well drilling and ...

Geotechnical drilling is daunting work in the construction, foundation engineering, and earthwork sectors. It helps professionals in these fields understand soil ...

Drilling rigs are essential machines used in various industries to create holes in the earth's surface. From oil and gas exploration to water well drilling and mining, these rigs come in ...

PROD is a portable, remotely operated seabed drill developed to deliver efficient and precise offshore geotechnical drilling. PROD enables downhole testing ...

Our Products TMG Manufacturing offers an extensive line of quality underpinning & compaction grouting products and drilling tools, installation equipment and ...

These rigs pack the pull and push power necessary to complete your geotechnical investigations for roadways, buildings, tunnels, and levees while also providing the control to fine tune your ...

PROD Technology Benthic is a global leader in offshore geotechnical site investigation and geotechnical engineering, in particular the use of remotely controlled seabed drill rigs for this ...

Find top Geotechnical Drilling Rig Manufacturers and a variety of Drill Rigs and Drillers. Explore Geotechnical Drilling Companies and Services including Geotechnical Drilling ...
