

Pemex drilling rigs

Will Pemex bring suspended rigs back into operation in 2025?

Getting your Trinity Audio player ready... Mexico's Pemex plans to bring suspended rigs back into operation by the end of 2025 to normalize its crude oil and natural gas production, management said Feb. 27. Mexico's state oil and gas company has been struggling to maintain steady production as it battles an aging portfolio and financial pressures.

How many drilling rigs did PEMEX have in 2022?

Tutorials and first steps In 2022, Pemex had 82 drilling rigs, up from 80 drilling rigs in the previous year.

When will Pemex rigs reopen?

These five rigs have been under a contract with Pemex since May 2019. The rig owner claims the temporary suspension will remain up to March 31, 2025. "Based on discussions with our customer, it is expected that some or all of these three rigs may be resuming operation prior to this date," highlighted Borr Drilling.

Does Pemex still lease rigs?

According to Borr calculations, Pemex has suspended contracts for 12 of the rigs it used to lease, including three of its own, which represents 45% of its fleet, Bruno Moran, Borr's chief commercial officer, said during the company's fourth-quarter earnings call with analysts.

How many Pemex rigs were suspended?

Pemex did not disclose how many rigs were suspended, but according to industry estimates the number could be as high as 12. This led to a sharp decline in Pemex crude and gas output at the end of 2024.

Will Pemex drilling activity resume as payments are normalized?

Borr expects Pemex drilling activity to resume as payments are normalized. During the company's earning call, Pemex management mentioned that it is actively working on normalizing contractor payments, which currently stand at around \$25 billion, noting that the company has resorted to bank loans to cover for the payments.
