

Railway Construction Rock Drill Accessories

How do railhead products drill?

Railhead products drill in a completely different manner, compared to any other tool in the market. By drilling in a random elliptical pattern, our tools create an annular space larger than the tooling. This reduces wear, increases flow and allows for faster corrections.

Who is railhead underground products?

Railhead Underground Products, LLC is the leading manufacturer of the drilling tools for the horizontal drilling industry. We produce world-class quality products that are built tough and fit all major brands of mini-HDD machines in the market.

What equipment do you need for a track crew?

Our product lineup includes everything from rail drill machines and Twister annular rail cutters to rail saws and an extensive selection of tools and accessories. Equip your track crew with our dependable, high-performance equipment to minimize downtime and ensure smooth, uninterrupted operations.

What is railhead incredibit?

Railhead's Incredibit is engineered to drill through tough rocky conditions. The patented product outsteers every other tool on the market. It typically makes corrections in half the time required by other imitators and conventional tooling. The design helps smaller machines that had been previously unsuccessful in completing tough condition bores.
