At Red Hawk Well Serving Inc., we take pride in providing nothing but the best when it comes to the quality of our service & equipment. Our current fleet of quality service rigs and support equipment consists of five mobile single free-standing and five mobile double free-standing service rigs.

What is crew Hawk?

Crew Hawk redefines Red Zone management for personnel. By monitoring hazardous working environments in real-time, this comprehensive hardware and software solution actively tracks individuals and equipment, providing anonymised feedback and information that focuses on safe operations and minimising risk.

Why should you use crew Hawk analytics?

By streaming data from the sensors to Crew Hawk Analytics, the system actively enhances safety and operational efficiency, and ultimately lowering the number of incidents and reducing downtime. This optimal Red Zone monitoring solution actively contributes to risk mitigation in the most challenging environments.
