

Repair of the rotator of down-the-hole drilling rig

Our down-the-hole drilling rig features high drilling accuracy and efficient performance, while the service life is also guaranteed.

Down-the-hole drilling (DTH) essentially involves a drilling hammer at the bottom of a drill string. It relies on three elements for drilling holes: bit loading (weight), rotation, and air.

DTH drilling, also known as Down-the-Hole drilling, is a method used to drill boreholes into the earth's surface. This technique involves a hammer that is ...

Rotary Drill Service Inc. was established in 1978 and has been serving the drilling industry for over 35 years. We've handled and completed thousands of repairs ...

Below pictures is comparison of the schematic fatigue behaviors of steel for those part with corrosion and without corrosion. And the last three pictures in right is showing the ...

KT11 integrated surface DTH drilling rig is using Cummins three diesel engines as a single power, by both ends of the output at the same time to drive the screw ...

The KT25 integrated down the hole drill rig for open use can drilling vertical, inclined and horizontal holes, mainly used for open-pit mine, stonework ...

What is foundation drilling? Foundation drilling is, in essence, using big machines to put big holes in the ground. Most residential homes have a reinforced, ...

Drilling Equipment Inspection, Repair and Overhaul Drilling Equipment Inspections Allrig has decades of experience of removal, inspection, ...

Down-The-Hole (DTH) Hammers have become the industry standard for the rapid drilling of boreholes for a variety of uses such as water wells and blasting.

Having a knowledgeable and available world-class partner on site or online, makes the difference between doing it alone and tapping the experience and ...

The PRD BH 45 250 rotary blast hole drilling rig is a specialized drilling solution designed for drilling for blasting in large-scale mines. It drills holes with a diameter of 165 mm to 240 mm ...

Repair of the rotator of down-the-hole drilling rig

Maintaining your rotary drilling machine is an important part of ensuring that it continues to function as intended. This may include checking oil levels, tightening loose bolts, replacing ...

Down-the-hole drilling (DTH) essentially involves a drilling hammer at the bottom of a drill string. It relies on three elements for drilling holes: bit loading ...

Tripping The Drilling Supervisor will be on the rig floor from start of the trip out of hole until the string is in cased hole. Prior to starting the trip (during circulating bottoms up) check the ...

The down-the-hole drilling rig uses the impactor and the DTH drill bits submerged into the bottom of the hole to impact and crush the rock. Therefore, it is called ...

1. RIG UP / TEAR DOWN / RIG MOVE Rig up is the on-site erection and connection of rig components in preparation for drilling or well servicing operations. Rig up ...

Drilling and Blasting Drilling and blasting are all about putting the right amount of energy in the right place at the right time at minimum cost to achieve maximum control over ...

In winter and summer, the seals of the rotary drilling rig are prone to thermal expansion and contraction, which may cause leakage. Especially ...

This chapter discusses the components and functions of a drilling rig and drilling tools. A drilling rig usually has six necessary subsystems classified as hoisting system, rotary system, ...

A top drive is an essential part of the drilling equipment. It is located on a drilling rig (Check also types of drilling rigs) hoisted on a rig mast ...

Smith Capital Equipment has been manufacturing Auger and DTH drill rigs for over 4 decades and our products include auger and down-the-hole rigs. ...

The down-the-hole drilling rig is a semi-hydraulic rig. Except for the use of compressed air for impact, other functions are realized through the hydraulic system. Therefore, the quality of the ...

When your rig is down, we eliminate the stress of getting you back up and running. In most cases, we can be on-site to repair your drill rig within 24 hours, regardless of where the rig is located ...

REVERSE CIRCULATION DRILLING "Reverse Circulation" drilling involves the supply of air down through the drill-string to decrease the "effective density" of the water in the center of the drill ...

The rig's operating parameters, instructions and warnings all can be clearly displayed on the dashboard, easy

Repair of the rotator of down-the-hole drilling rig

for the operator to monitor. The real-time ...

Rig installation and preparation 1. Prepare the rock-drilling cavern, the specifications of which can be determined according to the method of ...
