

Rigid drill

What makes a good drill?

The body of the drill is balanced, and because of the way the battery is positioned, the tool can stand up, making it easier to set down and pick up in the middle of a project (unlike many of the other drills, which can be placed only on their sides). It has plenty of power for around-the-house tasks.

Should you use a drill or a screwdriver?

A drill can do way more than a screwdriver. If you're just looking for a basic tool for hinge tightening, putting up hooks, or swapping out the batteries in a toy, a good screwdriver should do the trick. But once you get a little more advanced than that, a drill makes sense.

What is the shortest drill?

From front to back, the Milwaukee measures 5.625 inches, making it the shortest drill we've ever tested (that includes even the 12-volt drills, which are typically the smaller class).

RIDGID brushless motor technology delivers maximum performance and longer runtime. The RIDGID 18V Brushless 1/2 in. Hammer Drill delivers up to 800 ...

The RIDGID 18V Brushless 1/2 in. Drill/Driver has up to 800 in./lbs. of torque, giving it 20% more power than the previous model (R86009). With a 2-speed gearbox, users are able to ...
