How do I start a rock drilling project?

Before starting your rock drilling project, gather these essential items: 1. Hammer drill or rotary hammer (regular drills typically aren't powerful enough) 2. Diamond-tipped drill bits or masonry bits (appropriate for the size hole you need) 3. Water source (spray bottle or helper with water hose) 4. Safety goggles and gloves 5. Dust mask 6.

How to install a drop ear elbow?

If you've picked a PVC pipe, just insert the pipe nipple in the elbow and tighten it. But if you have picked the copper tube, you'll have to solder it to ensure a leak-proof joint. Don't worry; it's easy. First, insert the copper tube into the drop ear elbow. Then lay it down on a high surface horizontally. Now heat the joint and solder it.

Do I need a hammer when drilling rock?

Also ensure you're using the hammer function on your drill. Do I really need to use water when drilling rock? Yes. Water cooling is crucial as it prevents the bit from overheating (which causes it to dull quickly), reduces dust, and helps flush away particles that would otherwise impede drilling progress.
