

Rock face drilling rigs

Epiroc's rugged face drilling rigs are built for blast hole drilling in underground mining and tunneling with a wide range of cross sections. Standard features ...

The Boomer S10 face drilling rig is engineered for demanding mining and tunneling applications. Its highly durable design ensures precise positioning, rapid drilling cycles and reliable ...

A face drill rig is a transportation machine that works underground in tunneling and mining applications and that drills blast holes into the face of rock. Explosives are later placed into ...

The durable and robust Boomer M1D and M2D rigs are hydraulically controlled mining and tunneling face drilling rigs. With the strong BUT 36 S boom, these rigs are built with safety and ...

Epiroc's Simba long-hole drilling rigs offer a variety of feed lengths, positioning configurations, rock drills, and optional automated features for underground ...

GD651 Face Drilling Jumbo Our drill jumbos include wheeled face drilling rigs and tracked face drilling rock drilling rigs. GD651 has drilling diameter of 45-89mm, ...

Face Drills Mine Master offers a wide range of self-propelled drilling rigs suitable for various heights and width of headings. Plus a range of variant and optional ...

This hydraulic tunneling drilling rig is a face drilling rig designed with increased working height, suitable for large hard rock mines and tunnels with cross sections of 12-44m²;

The underground jumbo drill rigs from Epiroc are used for blast hole drilling in underground mining and tunneling. The rigs are equipped with up to four booms, covering cross sections from 6 m² ...

The Rock Face Drill Rigs Market is expected to witness robust growth from USD 1.2 billion in 2024 to USD 1.8 billion by 2033, with a CAGR of 5.0%. Explore comprehensive market ...

Multi Boom Rock Face Drill Rigs Market size was valued at USD output current value here in 2024 and is projected to reach USD output forecast value here by 2033, ...

We offer underground jumbo drill rigs with our reliable Direct Control System, DCS, or with the computerized Rig Control System, RCS, to which different levels of automation may be added. ...

The Hong Kong Rock Face Drill Rigs Market market is shaped by a mix of established multinational

Rock face drilling rigs

corporations and dynamic local firms. Leading players often leverage ...

Epiroc's rugged face drilling rigs are built for blast hole drilling in underground mining and tunneling. Choose your model of jumbo here and read more!

To increase productivity, efficiency, reliability and precision even further, the Boomer M20 S face drill rig has smart automation options available such as ...

Rock support drill rigs are engineered to install rock bolts that stabilize the rock face by transferring the load from an unstable mine exterior to the confined (and therefore stronger) ...

global productivity partner for mining and infrastructure customers. With ground-breaking technology, Epiroc develops and provides innovative and safe equipment, such as drill rigs, ...

The Boomer E3 (model names XE3 and WE3) is a hydraulic face drilling rigs for medium to large drifts and tunnels with cross sections up to 198 m². Even in the toughest rock conditions, ...

The global single boom rock face drill rig market is experiencing robust growth, driven by the increasing demand for efficient and cost-effective solutions in mining and ...

The Boomer M2 C face drilling rig is a modern hydraulic face drilling rig which is provided with COP rock drills and two robust BUT 35SL booms.

Mine Master drill rigs (also known as underground drill rigs, master rigs or face drilling rigs) are primarily utilized in underground mines (hard rock & soft ...

Rock support drill rigs are engineered to install rock bolts that stabilize the rock face by transferring the load from an unstable mine exterior to the confined ...

What Are the Primary Industries Driving Demand for Rock Face Drill Rigs Globally? The demand for rock face drill rigs is heavily influenced by three core industries: ...

The percussive diamond inserts also enable rig operators to improve the rig utilisation and reduce downtime as the need to regrind the inserts is eliminated. Robit ...

KAISHAN provides a full range of drilling rigs designed for different applications in the mining, tunneling, and other infrastructure industries.

To increase productivity, efficiency, reliability and precision even further, the Boomer M20 S face drill rig has smart automation options available such as the possibility to enable automated ...

Rock face drilling rigs

Epiroc offers state of the art drilling equipment for underground mining and tunneling. Our comprehensive range of rigs cover all your needs for production drills and face drilling rigs.

Face drilling rig is the rock drilling equipment traveled automatically, which are used for supporting, advancing, and moving one or more rock drills for the excavation of ...
