

Scorpion drill rig

What are scorpion oil tools?

Scorpion Oil Tools offers make up and break out tongs("Scorpion tongs") that work in all areas of drilling in the oil and gas drilling industry. Many applications require compact and portable tongs because of space limitations,such as on a drilling rig.

What is Scorpion Drill Tech?

Scorpion Drill Tech is a premier provider of Exploration,Drilling,Completion,&workover consultants. The Company is made up of well experienced independent drilling and completion consultants. Scorpion Drill Tech prides itself in finding the most competent and experienced people to meet all of its customers' requirements for any type of project.

Why should you use a scorpion rig?

The Scorpion can do this same job in a significantly shorter time (i.e. minutes,not hours) and is much safer because there is no use of loose parts or chains to get the job done. The Scorpion can be hoisted up to any height to break out pipes that are stuck even at the top of the rig. We serve the oil and gas industry.

Can a scorpion Tong be used on a rig?

Scorpion tongs can operate in both horizontal and vertical positions and can use a rig's hydraulic system for power,as well as electric and diesel motors. Another key benefit to using a Scorpion is the speed at which it can break out a stuck pipe.

What are the benefits of using a scorpion drill?

Another key benefit to using a Scorpion is the speed at which it can break out a stuck pipe. Normally,to break out a drill pipe that is stuck,workers must go through a very process that is dangerous,time consuming,and tedious. Flying chains,swinging pipes,and off-the-cuff maneuvers put workers at risk for physical harm.

How much torque does a scorpion Tong produce?

Scorpion manufactures tongs that take up limited space while being capable of producing torque of over 250,000 ft lbs.The specific torquing required by some applications (such as attaching drill bits) is handled via a torque control that prevents over-torquing and equipment damage.

Ball Motion - Controlled arc (about 4-6 boards less than Drilling #1) Pin Placement - Place pin at 5 - 5 1/2" from the positive axis point (PAP) HART Placement - ...
