

Screw air compressor air-510

How much power does a screw air compressor have?

Nascent Machinery Company is manufacturing the screw air compressor models with power ranging from 10 hp to 500 hp (7.5 kw to 400 kw). These direct driven compressors have standard full load pressure rating from 110 psi, 125 psi, 150 psi and 175 psi, 220 psi (0.8Mpa, 1.0Mpa, 1.3Mpa, and 1.6Mpa). Thank you for choosing our Screw Compressor.

What is a variable frequency screw air compressor?

Variable frequency screw air compressors have a high-efficiency rating, which means that they consume less energy compared to traditional air compressors. The variable frequency drive technology in these compressors allows them to adjust their speed according to the air demand, resulting in significant energy savings.

How oil injected screw air compressor works?

The oil-injected screw air compressor has the characteristics of reliable running performance, few wearing parts, low vibration, low noise, and high efficiency. During the compression process, the compressor continuously sprays lubricating oil into the compression chamber and bearings by virtue of its own pressure difference.

What makes Sullair a good air compressor?

That's why Sullair provides premium efficient motors as standard. Plus, the Sullair air end is designed to deliver maximum output with minimum power consumption, giving ShopTek compressors a superior energy advantage. Sullair ShopTek® air compressors redefine industry standards continuous duty compressors in the 5 to 100 hp range.

Do variable frequency screw air compressors need a permanent magnet motor?

The use of a permanent magnet motor in variable frequency screw air compressors provides several advantages over traditional air compressors. Permanent magnet motors are more efficient and have a longer lifespan. They also operate with less noise and are capable of operating at a higher speed.

Do screw compressors need lubricant?

Screw compressor requires the minimum amount of inspection and maintenance. The controller and indicator alert the operator to perform required maintenance or repair unit problems. Screw compressors are filled & tested with Total lubricant. Refer Figure in 1.2 for filler port, oil mirror, quarter-turn valve location on the reservoir.
