

Sedco 704 drilling rig

How does the Sedco 706 semisubmersible rig work?

In order to achieve this, the Sedco 706 semisubmersible rig relies heavily on its Dynamic Positioning (DP) system for automatic station keeping; it previously relied on anchors. As a result of the upgrade, Sedco 706 now features a DP class 2 system provided by Kongsberg Maritime.

Is Sedco 704 a midwater floater?

Like the ill-fated Transocean Winner, Sedco 704 is what the Swiss-registered rig owner refers to as a "midwater floater". In February Transocean booked a \$668 million impairment loss on this group of 11 assets as the day rate it can charge for them slumped.

Why did Transocean upgrade its Sedco 700 rigs?

FROM THE FULL PICTURE MAGAZINE -- To meet market demands for deepwater drilling, Transocean chose to upgrade two of its Sedco 700 series drilling rigs to dynamically positioned class 2 semi-submersible rigs. The process was so comprehensive the rigs were classified as newbuilds.

Does Sedco 706 have a DP class 2 system?

As a result of the upgrade, Sedco 706 now features a DP class 2 system provided by Kongsberg Maritime. The upgrade also consisted of systems for power management, thruster control, vessel control & auxiliary as well as fire and gas with emergency shutdown from Kongsberg Maritime.

Will Transocean scrap the Sedco 704?

Transocean is understood to be scrapping the Sedco 704 once it has finished an appraisal campaign for Independent Oil and Gas (IOG) in the North Sea at the end of the month.

Did Transocean upgrade the Sedco 706?

The retrofit of the Sedco 706 is the second in a double conversion contract. Transocean had already upgraded its Sedco 702, with mainly the same team from Kongsberg Maritime involved. The lessons learnt from this first conversion became the basis for the Sedco 706 project.
