

Semi drilling rig bicentenario

What is the Bicentenario rig?

BICENTENARIO Pemex contracted the Bicentenario rig in July 2011 for a five-year time period. It is a sixth-generation semi-submersible platform for deepwater and ultra- deepwater drilling, and will drill the Talipau-1 well located in the Gulf of Mexico.

How many people can a Bicentenario rig accommodate?

Constructed by Daewoo Shipbuilding and Marine Engineering, the Bicentenario rig has capacity to drill to a 5,000m depth. It is 138m tall, weighs 58,000 tonnes and has eight engines that allow it to remobilize independently. In addition, the Bicentenario platform can accommodate up to 160 people at a time.

Why did Grupo R buy Bicentenario?

According to Marco Antonio Moreno Gonzalez, Grupo R's Director of Drilling Operations, it was the acquisition of the Bicentenario semi-submersible drilling platform in 2011 that will help Mexico make the leap to deepwater and ultra-deepwater areas.

Who owns a semi-submersible drilling platform?

Marine Drilling Grupo R operates the sixth-generation semi-submersible drilling platform, La Muralla IV; Gremsa operates the Centenario semi-submersible drilling platform; and IPC has drilled and completed oil wells offshore and onshore since 1987.

Which rig drilled the Lakach well?

The Lakach-1 well was drilled by the semi-submersible drilling rig Bicentenario whereas the Lakach-2DL appraisal well was drilled by the Noble Max Smith semi-submersible drilling rig. Non-associated gas at the deepwater field is found in reservoirs of the Lower Miocene age, primarily comprised of lithic sandstone and limolites.

Who owns the Centenario rig?

The Centenario is property of Grupo R's subsidiary Grupo R Exploracion Marina (Gremsa). Friede & Goldman Lt. designed the rig and Gremsa used it to drill the Nen-1 well 113 km northeast of Coatzacoalcos in Veracruz. The well proved the existence of a large natural gas deposit and the real potential for deepwater drilling in the area.
