

Singapore screw air compressor shop

Who are the best air compressor suppliers in Singapore?

As a leading air compressor supplier in Singapore, we offer a wide range of top brands in the market like Einhell (Germany), Daewoo (South Korea), Xinlei (China), Metabo (Germany), Hitachi (Japan) and La Padana (Italy) that cater to all of our customers' requirements.

How to choose a screw compressor supplier in Singapore?

Finally, choose the right supplier for your screw compressor. Atlas Copco is an authorised distributor in Singapore well-known for their customer service, who can provide ongoing support and assistance with your compressor. Consider suppliers who offer comprehensive training and after-sales support to ensure you get the most from your investment.

What is a screw compressor?

The rotors compress air gradually along their length, making screw compressors well-suited for continuous operation and high-volume applications. Screw compressors are a new and improved type of compressor that offers many advantages, making them the system choice for service trucks and fleet managers in Singapore.

What is a rotary screw air compressor?

The entire rotary screw air compressor is designed to run at high speeds while delivering a high flow rate in a compact package. Due to its heavy duty and high performance nature, this type of screw air compressor is often used for hazardous or rugged working environments. It also lasts quite long with regular maintenance.

Why should you use Beng Chuan air compressors in Singapore?

Using Beng Chuan air compressors in Singapore promotes the utmost efficiency when it comes with energy use. This is because of the low-speed rotor system which reduces oil flow resistance and decreases an outbreak of heat. Air compressors, especially the items we have here in Beng Chuan Singapore, offer greener solutions.

What is oil-free air compressor & screw air compressor?

Oil-free air compressors and screw air compressors follow this principle. Utilising centrifugal force, the kinetic energy is transferred. This method is responsible for creating pressurised air inside the air compressor tank.
