

Singapore supply screw air compressor parts

What is oil injected rotary screw compressor?

This liquid is used to cool down the air that is being compressed and to lubricate the moving parts. During discharge, oil-injected rotary screw compressors are also highly efficient in preventing leaks. The air that is being sucked by the compressors always contains water molecules.

Do rotary screw compressors prevent leaks?

During discharge, oil-injected rotary screw compressors are also highly efficient in preventing leaks. The air that is being sucked by the compressors always contains water molecules. The role of refrigerated compressed air dryers is to dry the air inside the compressor.

How does a rotary screw compressor work?

This type of compressor works by injecting a liquid into the compression chamber. This liquid is used to cool down the air that is being compressed and to lubricate the moving parts. During discharge, oil-injected rotary screw compressors are also highly efficient in preventing leaks.

Do rotary screw compressors use oil?

Purity of the air is essential for many facilities where a single hint of contaminant can affect the safety and quality of the operations. This is where oil-free rotary screw compressors are proven to be essential. These compressors do not use oil for sealing and cooling functions. Thus, compatible for areas with strict air quality protocols.

Why do air compressors need to be certified in Singapore?

Every air compressor in Singapore must be certified and registered with MOM for adherence to public safety laws and environmental protocols. We supply quality and safe air tanks as well as register them with MOM to guarantee the safety and well-being of our clients.
