Are small oil pumps better than large pumps? Single small pump fits on one square of roadside and produces 48 barrels a week, while a large pump takes four squares and only produces 80 ...

OverviewNamesAbove groundDown-holeWater well pumpjacksA pumpjack is the overground drive for a reciprocating piston pump in an oil well. It is used to mechanically lift liquid out of the well if there is not enough bottom hole pressure for the liquid to flow all the way to the surface. The arrangement is often used for onshore wells. Pumpjacks are common in oil-rich areas. Depending on the size of the pump, it generally produces 5 to 40 litres (1 to 9 ...
