

Soil testing drilling rigs

How do you use a soil test rig?

The specific working process is as follows: Drilling: First, use the drilling rig to drill a hole in the soil layer to be tested. Penetration hammer: Connect the standard penetration hammer to the drill rod and insert it into the drill hole.

What is a soil investigation rig?

Our STR Soil Investigation Drill Rigs are designed specifically for the geotechnical engineer and soil testing contractor. These rigs are compact yet powerful and include a 4-speed gearbox, telescopic tower and single or double winch. Also included are a mud/water pump, pipe clamp, manual SPT hammer system and top-intake wet swivel.

How does a SPT drilling rig work?

The working principle of the SPT drilling rig is relatively simple. It drives the standard penetration hammer into the soil by hammering and judges the compactness of the soil layer according to the number of hammers. The specific working process is as follows: Drilling: First, use the drilling rig to drill a hole in the soil layer to be tested.

Why should you use a portable rig for geotechnical drilling?

Home » Solutions » Geotechnical Drilling Our light weight compact portable rigs are used for geotechnical drilling and soil sampling as well as having sophisticated site investigation and compaction control capability so you are able to get results immediately and make site characterisation decisions in the field.

What is a truck mounted drill rig?

Truck mounted drill rig (DOES NOT INCLUDE TRUCK. Truck supplied by customer) Our SPT test drill rigs are designed for the geotechnical engineer or soil testing contractor that needs a compact, powerful test rig with more features than any drill rig in its class.

What is a borehole rig used for?

The borehole diameter is small and is mainly used to obtain soil samples and test soil layers. Core drilling rig: Drill into the rock formation by rotating the drill bit, and using the core barrel to retrieve the core. The diameter of the borehole is relatively large and core samples are mainly obtained.

HSA, mud rotary and cased drilling methods including split spoon sampling (SPT), shelly tube, piston sample, vane shear, packer and permeability testing and installation of geotechnical ...

Drilling Rig for Your Geotechnical Projects Choosing the right drilling rig is one of the most critical decisions you'll make when undertaking geotechnical projects. Whether you're conducting soil ...

Soil testing drilling rigs

Geotechnical Drill Rigs Engineered for Precision, Power, and Performance In today's construction, mining, and infrastructure development projects, accurate subsurface data is essential. ...

We are a SAC SINGLAS accredited site investigation inspection body in Singapore and provide quality soil investigation works with advanced crawler mounted wireline drilling rigs with ...

Drill rigs are machines that perform many subsurface functions, including oil and gas exploration and extraction, rock and soil sampling and testing, and subsurface installation of underground ...

MATECO offers a variety of drilling and testing services to meet the each of our client's needs, including: Our drilling equipment is available for both onshore ...

Explore our selection of geotechnical and environmental drill rigs, engineered to navigate complex soils and environmental drilling projects. We offer reliable ...

SPT rig, or standard penetration test drill, is a drilling equipment widely used in geological surveys, engineering construction, and other fields.

Soil sampling equipment from Little Beaver ensures efficiency, precision and accuracy, even in remote locations. The Big Beaver auger and SSK-1 cathead kit are the ideal combination for ...

Harikrishna Eng is one of the companies that bring forth high quality Drilling Products for its clients. We are one of the leading Manufacturers, Exporters ...

Drilling tools for sampling soil when conducting geotechnical soil tests, including spt samples. Soil testing equipment includes interlocking split spoons.

Soil Investigation Drill Rig is ideal for Exploration drilling application in the rock formation. Thanks to its simple and compact design, excellent performance, ...

Site Investigation We have been providing quality soil drilling, offshore marine drilling and rock coring including in-site soil testing and sample recovery ...

Profile Drilling has 3 traditional style drill rigs which we use to obtain geotechnical information for our clients. These rigs have varied capabilities which include ...

Portable soil sampling equipment provides a unique solution for soil sampling contractors who need equipment for tight spaces and for site preparation.

APOD Soil Testing has a large range of equipment available for all types of work. Our fully maintained fleet

Soil testing drilling rigs

of drill rigs and support vehicles are at your disposal with all of your ...

TMG manufactures a line of powerful and compact SPT test rigs designed for the geotechnical engineer. Our SPT test drill rigs are used for rotary drilling, ...

Innovation and versatility allow Massenza rigs for geotechnical applications to satisfy the requirements of such an active and diversified market: soil ...

Boring methods are widely used for subsurface investigations to collect samples, in almost all types of soil, for visual inspection or laboratory testing. There are ...

Soil Investigation Drill Rig is ideal for Exploration drilling application in the rock formation. Thanks to its simple and compact design, excellent performance, high accessibility and reliability at ...

APOD Soil Testing has a large range of equipment available for all types of work. Our fully maintained fleet of drill rigs and support vehicles are at your disposal ...

AMS Powerprobe Direct Push Soil Sampling and Soil Testing Drilling Rigs and attachments for sale. Powerprobe 9410 VTR, 9580 VTR, AMS Ag Probe and many other models. Professional, ...

These rigs give you the ability for SPT, CPT, wireline coring and rotary drilling-all in one compact rig! Designed for both the geotechnical engineer and soil ...

The most complete line, with the largest variety, of Soil Sampling, Coring and Hydraulic Powered Drilling Equipment available today. Giddings Machine ...

The LST1G+ soil sampling/geotechnical drill rig is ideal for soil sampling, geotechnical testing and well monitoring in limited-access areas.

We can provide timely mobilization of a rig and crew to the project site seven days a week. We also utilize all terrain and limited access drill rigs which are run by technically trained crews. ...

Soil Testing Machine manufacturers - Harikrishna Eng exporters & suppliers of Mobile Soil Testing Machine, Soil Testing Machine, Soil Test Machine ...

Our SPT drilling and soil investigation platforms are specifically designed for geotechnical engineering. These platforms are compact but powerful and can ...
