

Sonic drill rig ep 26

What is a sonic drill rig?

Sonic drill rig manufacturers of full-size and mid-size sonic rig. Sonic drill rig includes 50K dynamic force head engineered by Geoprobe®;

What is sonic drilling?

Sonic drilling is a method of drilling that uses sonic waves to vibrate at a certain frequency to advance the drill pipe. The frequency is variable and controlled by a skilled operator this frequency is also dependant on the geology.

What is a ep-26 rotary drill head?

38 kN (max.) 3.9 kN (max.) TONE-PROBE EP-26 Drill Head was the first model of our vibratory-rotary drills. This was designed for environmental investigation without drilling fluid and the developed EP-26N was launched a few years ago. More than 130 units have been supplied domestically and internationally.

What is a full power sonic drill?

Both track and truck mounted options are available, each utilizing full power Sonic drill heads capable of operating casing up to 12 inches in diameter to depths of 200+ meters. These compact rigs combine the advantages of a full power Sonic drill with the smaller size of a track mounted carrier.

What is a long stroke Sonic rig?

Long Stroke Sonic rigs offer maximum production rates on deeper site investigations. Both track and truck mounted options are available, each utilizing full power Sonic drill heads capable of operating casing up to 12 inches in diameter to depths of 200+meters.

Does a Geoprobe® Sonic drill rig come with support?

SUPPORT: Investing in an engineered Geoprobe® sonic drill rig and tooling system comes with training and service support-- where one phone call gets you whatever you need. Purchase includes free factory training on rig operation and maintenance.
