

Steel Shield Screw Air Compressor

Why do you need a Sperre screw compressor?

Sperre screw compressors are the natural choice for installations where a large volume of low pressure compressed air is needed. The unique design of the air end secures high efficiency and durability. Thanks to the efficient air end the leakage is reduced. Our screw compressors ensure high output and lower power consumption.

Why should you choose a screw air compressor?

Air quality of your compressed air is crucial for the performance of your operation. Our screw air compressors have few moving parts and are designed with everything in one complete cabinet. This ensures a safe work environment, reduces the risk of oil leakage and makes maintenance easy.

Which Ingersoll Rand rotary screw air compressor is right for You?

Engineered for efficiency and built for longevity, the Ingersoll Rand Next Generation RS Series 90-160 kW oil-flooded rotary screw air compressors are your reliable partner in maximizing productivity. Designed with both fixed and variable speed options, these compressors provide adaptable, energy-efficient performance tailored to your needs.

What lubricant does a screw compressor use?

These compressors still use lubricants for other processes, like motor cooling, but some variants use water as an alternative lubricant. Oil-free types are known for their reliability, efficiency, and ability to deliver the highest air purity at the lowest TCO. Pure, oil-free air with AQ water-injected screw compressors.

What is a rotary screw compressor?

Rotary screw compressors are designed for a wide range of users across various industries and applications. They are powered by two counter-rotating screws that compress air as it moves through the compressor. These units are designed for continuous use, capable of operating 24 hours a day, 7 days a week.

What is a GA Xtreme oil-injected screw compressor?

Discover the GA Xtreme oil-injected screw compressors, designed to excel in the harshest conditions. Oil-free compressors do not use oil in the process, making them ideal for sensitive industrial applications where air purity is critical, such as in the food and beverage or pharmaceutical industries.
