

Swamp buggy drill rig

What is a swamp drill rig?

The swamp drill rigs are mostly customized and designed for transit zone or swamp area. Different models of swamp drills are mounted on different chassis: different swamp buggy, barge or boat. The drill has mud and auger drilling functions with special designed structure to improve the efficiency of drilling in marsh or/and transit zone.

Can I design a seismic drill buggy?

You can design a seismic drill buggy for your specific jobs, the terrain you will be on, and the workload. Here at Wetland Equipment, we can make a variety of seismic drills, such as shot hole drilling or explosive drilling, plasma sound source or sparker rigs, seismic vibrator rigs, and boomer source rigs.

Are wetland equipment seismic drill buggies worth the cost?

Wetland Equipment works closely with customers during the design and manufacturing process, so each seismic drill buggy is tailored to your exact needs. Because they are completely customizable, our seismic drill buggies are well worth the expense.

How do I choose a swamp buggy?

Your swamp buggy will be based on your requirements- everything from fittings for auxiliary components to the amphibious underbelly will be designed to your specific needs. Zinc-coated pontoons can help in deep water, while recessed track technology will keep debris and mud from collecting.

Why should you buy a swamp buggy?

When you purchase a swamp buggy from us, you can guarantee that it will be completely customized to suit your needs. That includes elements such as the vehicle payload, dimensions of the equipment which will be used, personnel using the vehicle, and mast lengths for drilling. Made for Any Job

What engine does a swamp buggy use?

Our swamp buggies are powered by engines from globally recognized manufacturers such as Isuzu, Cummins, CAT, Detroit, and John Deere. When you purchase a swamp buggy from us, you can guarantee that it will be completely customized to suit your needs.
