

A tender assisted drilling rig (TAD) is a specialized type of offshore drilling rig used extensively in the oil and gas industry. This innovative approach co...

A purpose built barge-type self-erecting tender assisted drilling (TAD) rig with a flat bottom, raked stern and bow hull shape. The rig is designed as a cost efficient for ...

The DES is usually designed to be shipped on large workboats, so the tender hull can arrive early, finish construction (eliminating an expensive derrick barge), ...

The paper analyses some advantages and disadvantages of the first-ever Tender Assisted Drilling Rig (TAD) in Vietnam and the efficiency of its utilisation after three-year operation for Bien ...

The Sapura T-9 is a purpose built barge-type self-erecting tender assisted drilling (TAD) rig with a flat bottom, raked stern and bow hull shape. The rig is designed as a cost ...

Sapura Energy wins \$732 million-worth of rig contracts from industry heavyweights New charters and extension of tender assist drilling units boost Malaysian contractor's order ...

Sapura Energy wins \$732 million-worth of rig contracts from industry heavyweights New charters and extension of tender assist drilling ...

What is a Tender Assisted Drilling Rig? A tender assisted drilling rig is one of offshore drilling rigs, essentially a two-part system comprising a ...

An artist's impression of a Smedvig semisubmersible self-erecting tender rig rigged up alongside a TLP wellhead platform in deepwater. Click ...

Learn what a tender assist drilling rig is, how it works, and why it is used for deepwater drilling operations. Find out the advantages, challenges, ...

T-15 is a purpose built barge-type self-erecting tender assisted drilling rig with a flat bottom, raked stern and bow hull shape. The rig is designed for development drilling involving multiple well ...

There are about 25 TADs in existence today, with most being monohull tenders. Four are semi tenders and offer the motion characteristics to drill in mild to somewhat severe ...

The first purpose built semi-submersible self-erecting tender assisted drilling (TAD) rig was delivered on 06th

Tender assisted drilling rig

April 1994 featuring dual BOP system (21 ¼ 2k & 13 5/8" 10k). The ...

There are two types of Tender Assist Drilling (TAD) rigs - tender rigs and semi-tender rigs. Both carry the same equipment but the latter can operate in far deeper depths and harsher ...

The TAD remains in place in order to provide power and other services that support the drilling operation. There are two different types of ...

Seadrill T-15 is a purpose built, self-erecting, tender assisted drilling (TAD) rig pairing an advanced design Light Weight Drilling Equipment Set with an upgraded T-12 type ...

A purpose built semi-submersible self-erecting tender assisted drilling (TAD) rig was delivered on 01st November 2001 featuring dual BOP system (21 ¼" 2k & 13 5/8" 10k). The rig ...

Tender assisted rigs are an existing type of development drilling, workover or plug and abandonment rig (same "family" as jack up rig, semi-submersible or drillship). However, it is ...

Tender assisted drilling with self erecting rig capability is a proven technology which in shallow water areas such as Southeast Asia and West Africa has been in use for more than 25 years.

Sapura Berani is a semisubmersible self-erecting tender assisted drilling rig featuring dual BOP system, offline pipehandling, stand building and ...

Tender Assist Drilling (TADs) units are drilling units constantly challenging the status quo in drilling. By being in a red ocean market, Tender Assisted had to always find its ...

SKD T-18 A purpose built barge-type self-erecting tender assisted drilling (TAD) rig with a flat bottom, raked stern and bow hull shape. The rig is designed as a cost efficient for development ...

Tender Assisted rigs are considered as one of the most efficient and economical type of rig for development, work over or Plug& Abandonment (P& A). They are composed of a support ...

TADs were the rig of choice in the 1950s and early 1960s in the GOM for development drilling off fixed platforms. However, the monohull tenders tended to lose location ...

SKD T-19 A purpose built barge-type self-erecting tender assisted drilling (TAD) rig. The D.E.S. is also designed to have offline capabilities for cementing, stand building and logging. The tender ...

With a flat bottom, raked stern and bow hull shape, the Sapura T-10 is a purpose built barge-type self-erecting tender assisted drilling (TAD) rig. The rig has a cost efficient ...

Tender assisted drilling rig

The drilling contractor proposed to couple the platform rig to one of their existing tender vessel, that is usually used to assist its own drilling rig, creating the first ever hybrid ...

SKD T-11 A purpose built barge-type self-erecting tender assisted drilling (TAD) rig with a flat bottom, raked stern and bow hull shape. The rig is designed as a cost efficient for development ...

The 2009-built West Vencedor is a purpose-built semi-submersible self-erecting tender-assisted drilling rig featuring 10K dual BOP, off-line pipe ...

Sapura Drilling consistently delivers innovative technical and effective commercial solutions, which has strengthened its standing as the preferred and trusted tender assist ...
