

The crust mobile drilling rig how to find mine

What is a mobile drilling rig?

The Mobile Drilling Rig is a large vehicle that mines the moon's surface for regolith. The upgrades unlocked with this research are automatically applied to all MDRs, current and future. The mining speed upgrades increase the speed at which the MDR generates regolith by 25% each.

Where can I find a broken mobile drilling rig?

On the moon surface your rover can discover a broken mobile drilling rig. At the moment where you repaired this Rig, you trigger the last mission of the Crust. Can be compared to Factorios Rocket start. I felt like I have not seen a more end game type of guide so far, so I decided to describe what I have done so far.

Can a rover find a broken mobile drilling rig?

On the moon surface your rover can discover a broken mobile drilling rig. Do not complete this mission before you are prepared. At the moment when you repair this Rig, you trigger the last mission of the Crust. Can be compared to Factorios Rocket start.
