Because the drill rod of the down-the-hole drilling rig does not transmit impact energy, the impact energy loss is small, so deeper holes can be drilled. As the impactor works deep into the hole, ...

But you want to be careful not to drill the holes too large or the idle speed will be too high with the throttle blades completely close. A set of four ...

Drilling holes in the throttle blades will only make it worse. The most common fix is more timing to raise the idle and then closing down the throttle blades to bring it back to where ...

DTH drilling offers several advantages over top-hammer drilling for larger, deeper holes in medium-hard formations. Because the hammer is at the bottom of the ...

As a supplier of DTH drilling rigs, I've seen my fair share of issues that can pop up with these machines. In this blog, I'm gonna share some tips on how to troubleshoot a DTH ...

Consists of integrated down-the-hole drilling rigs,full hydraulic open-pit drill carriages,multifunctional cutting drilling rigs, ground screw drilling rigs, down hhole rock drill jumbos ect. It is widely ...

No! Slowing the idle down is accomplished by reducing air. Drilling the plates to allow more air is not effective. If the idle will not come down you have issues. Most common ...

The down-the-hole drill rig throttle does not respond

Drilling the slide lift-holes allows the vacuum to have a greater and quicker effect on the lifting of the slide. This will increase the responsiveness of the slide and therefore ...
