

Tie back drill rig

The new SM-11 is a 25,000-pound micropile/tieback drilling rig that offers high performance and efficiency in a compact size. This top-performing rig uses ...

ECA maintains a deep, diverse and unmatched fleet of rental equipment from leading manufacturers including BAUER, RTG, Klemm, and others. Each piece of equipment is ...

In contrast, our liner tieback system lets you run a conventional hanger system and tie the liner string back to the wellhead without sacrificing casing integrity or rating.

Excavations with Tiebacks and Rock AnchorsA tieback is made by first drilling a hole with an auger and then placing a bar (tendon) in the hole, concrete is ...

Soilmec SM-14 is a multipurpose drilling rig. Its modular design is engineered for the execution of: Micropiles, Tie-backs, Jet-grouting, Drain, Water wells. The ...

The MC 8 is an extremely versatile and powerful small/medium size hydraulic drilling rig, designed for civil engineering works such as micropiles, anchors, ...

Tiebacks to reinforce a slurry wall at Ground Zero, New York In geotechnical engineering, a tieback is a structural element installed in soil or rock to transfer ...

We offer a range of tieback equipment--including polished bore receptacles (PBRs), a seal stem, a packer, and a PBR packoff--that helps you to remove debris, clear excess cement, and re ...

Tie-Back Liner Tie-back is a string to connect a liner back to well head. It is fairly common for oil and gas wells and they almost always run for geothermal with sometimes 2 on one well. Tie ...

Conventional liner hanger equipment is unable to match the ratings of the casing in these well designs, especially when the liner must be tied back to surface. In contrast, our liner tieback ...

The methods we discuss below can be used for structural load-bearing support, tie-down anchors to prevent uplift, slide stabilization, and earth retention. ...

Another term for tieback liner, a section of liner that is run from a liner hanger back to the wellhead after the initial liner and hanger system have been installed and cemented.

Precision Drilling for Limited Access Foundation Reinforcement Tiebacks and micropiles are essential for

Tie back drill rig

structural reinforcement, slope stabilization, and deep foundation support, ...

"Petroleum Engineering: Drilling and Well Completion" by William C. Lyons: This comprehensive text covers well completion techniques, including tie-back methods, in detail. "Oil Well

...

The use of powerful engines, high standard components and advanced circuit design has enabled Soilmec Quality The soilmec advantage to increase performance and reliability under extreme ...

Choose the right foundation drilling equipment for your construction project. Learn about types, safety, maintenance, and top brands like Soilmec and Tescar. Contact us for ...

When it comes to anchor, tie-back, and tie-down equipment, Malcolm Drilling owns a large fleet of Klemm dual rotary drill rigs and tools suitable for all types of drilling conditions.
