

# Travel motor structure of down-the-hole drill

In down-the-hole drilling a drill rod is fitted with a hammer at its lower end. The hammer, which is mounted on the drill bit, is activated through the addition of compressed air and driven into the ...

?????? Integrated Down The Hole Drill Rigs ???,??Compact of bench blast size but ...

The working temperature in deep down-hole is relatively high, the influence of high temperature in deep hole on the electromagnetic thrust of the linear motor is then analysed. A motion model ...

Reverse circulation down-the-hole (RC-DTH) air hammers have been widely used in construction and mining activities owing to their high drilling efficiency and good dust control ...

As drilling fluid, or mud, is pumped down the drill string, it flows through this rotor-stator assembly. The resulting differential pressure causes the rotor to rotate ...

Down-the-hole drilling (DTH) essentially involves a drilling hammer at the bottom of a drill string. It relies on three elements for drilling holes: bit loading (weight), rotation, and air.

An external motor connection failure causes a substantial pressure loss while on-bottom. In the event of a parted motor, the Bottom Hole Assembly (BHA) is picked up off-bottom and the ...

The drilling tool is composed of a bit drill rod, a button drill bit and an impactor. When drilling, use two drill bit drill rod extension rods, stainless ...

Down-the-hole drill DTH drill tool operated with drilling mud (Drillstar MUDHammer) A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the ...

DTH drilling, also known as Down-the-Hole drilling, is a method used to drill boreholes into the earth's surface. This technique involves a hammer that is ...

6. Infinitely variable speed-the unique gas valve structure completes the automatic rotation of crawler-type down-the-hole drilling rigs. The automatic rotation of the equipment is ...

Wenzel offers a versatile array of Downhole motors available for straight, directional, horizontal, workover, coil tubing, and utility applications. Wenzel motors utilize the industry's best ...

# Travel motor structure of down-the-hole drill

Drilling is a process whereby a hole is bored using a drill bit to create a well for oil and natural gas production. The term drilling also indicates the whole complexity of operations necessary to ...

In directional drilling, the motor is typically positioned between the bit and a bent sub (a specialized section of drill pipe with a predetermined bend). This bend, along with the motor's ...

A down-the-hole drill, usually called DTH Drilling Rig, is basically a mini jackhammer screwed on the bottom of a drill string. The speedy hammer ...

4. Travel motor (for mobile down-the-hole drill): oFunction: drives the drill rig to move on the construction site to improve the flexibility of the operation. 5.

Down Hole Drilling, or DTH, refers to a drilling technique that involves a hammer being directly attached to the end of a drill string. This method is widely used ...

CENTER ROCK products boast a formidable range of down-the-hole (DTH) hammers, presenting a suite of drills and downhole bits spanning 3.5"- 48" ...

Down-the-hole drilling (DTH) essentially involves a drilling hammer at the bottom of a drill string. It relies on three elements for drilling holes: bit loading ...

The working temperature in deep down-hole is relatively high, the influence of high temperature in deep hole on the electromagnetic thrust of the linear motor is then analysed.

1.3 Structure and Function A drill has a simple shape at first glance, but each part has a close relationship with each other. Each part affects the tool's overall machining efficiency, tool life, ...

Powerful and Reliable Down The Hole (DTH) Drilling Solutions Drill King specializes in manufacturing top-quality drilling equipments and drilling tools, including a wide array of drilling ...

The SmartROC D65 down-the-hole drill rig brings the future of mining within your reach today. Isn't it time you gave your operation the chance to profit from the added intelligence of the ...

As pressure increases, the cavity progresses down the rotor by forcing the rotor to rotate and progress around the spiral profile. This action converts hydraulic horsepower into ...

The DTH drilling rig (down-the-hole drilling machine) is a kind of drilling machine, which is mainly used for drilling in rock formations. The down-the-hole drilling ...

TAIYE 370A-DTH is a multi-purpose internal combustion-driven crawler mounted hydraulic drilling rig,

which is especially suitable for drilling big holes, the hole ...

The structure of tube linear motor is suitable for the inner hole space of drill pipe, by increasing or decreasing longitudinal coil length, it can attain different impact power [13].

This study proposes a novel structure of self-rotating pneumatic hammer (NSH) with a built-in rotational mechanism, which converts partial impact energy of the piston to rotate the ...

Downhole motor with bent sub. The bent sub acts as the pivot of a lever, and the bit is pushed sideways as well as downward. This sideways component of force at the bit gives ...
