Sovonex(TM) traveling blocks are the preferred choice for most of our drilling rigs, including fast-moving rigs, and truck-mounted rigs (mobile drilling and service rigs) due to their rigid design ...

400T We deliver high quality designs of traveling blocks and beackets that range from 250 ton to 1250 ton capacity. All of our blocks are manufactured and monogrammed to API 8C with ...

Overview of Traveling Block and Hook Block The traveling block and hook block is an important key equipment in the workover operation. Its main function is ...

Sovonex(TM) traveling blocks are the preferred choice for most of our drilling rigs, including fast-moving rigs, and truck-mounted rigs (mobile drilling and service ...

The Traveling Block: A Crucial Component in Drilling & Well Completion The heart of any drilling rig lies in its ability to hoist and lower equipment, pipe, and tools within the wellbore. This ...

The primary function of traveling blocks is to bear the weight of the drill string, including the drill pipe, drill collar, and various drilling tools. By sharing this load, traveling blocks prevent ...

The Powerhouse of the Rig: Understanding Blocks in Drilling & Well Completion Drilling for oil and gas requires lifting and moving heavy equipment with precision, and that's where blocks come ...

Capacities Available: 250, 350, 500, 750 and 1000 Tons Double row, pre-adjusted tapered bearings with seals. Blocks contain McKissick & Roll-Forged TM ...

The hook block assembly is the hoisting equipment for oil-drilling rig. It is mainly used to hoist and trip the drill pipe, replace bits, run the casing during ...
