True Oil LLC is a family-owned exploration and production company operating mainly in the Rocky Mountain region with the capability and expertise to explore and operate throughout the United States and other countries. True Drilling LLC, is a contract drilling and well servicing company, operating in the Rocky Mountain region.

How many true drilling rigs are there?

The rig is one of 13 total owned and operated by True Drilling. As of March 24, there are three rigs in service, True's director of drilling Bill DeGraeve said. The company focuses its activity in the Rocky Mountain region, including Wyoming, Colorado, Montana and South Dakota.

How much power does a drill rig use?

To power the drilling operation, a portable diesel-powered generation plant produces 1,100 kW of electricity to run the 1,500-horsepower drawworks system that's connected by a steel cable to the drilling mechanisms. The roar inside the generating room producing all that power is unbearable, even with hearing protection.

How long does it take to assemble a drilling rig?

The process of assembling a rig once it's on site takes roughly five or so days, he said. In this case, the rig will drill a single well, which takes about 20 days, before it's torn down and moved just a few miles down the road to drill more wells. This rig drills down and horizontally nearly five miles through shale, he said.

What does it take to operate an oil drilling rig?

CASPER, Wyo. -- Operating an oil drilling rig takes an enormous amount of planning, not only from an engineering standpoint, but a practical one as well. "They come here knowing to bring their groceries for two weeks," said Seth Zupanick regarding the rig's 20 shift workers.
