

Vli drill rig

What equipment does VLI provide?

VLI provides a comprehensive and diverse range of equipment including drilling rigs, mining equipment, and conveyor systems, all designed and manufactured by our own team, to the highest specifications. Our operations are comprised of two business divisions; VLI Drilling and VLI Conveyors.

How many divisions does VLI have?

Our operations are comprised of two business divisions; VLI Drilling and VLI Conveyors. We have a team of over 450 specialist personnel employed throughout Australia, USA, and China. Due to our commitment to research and development, our team has access to the most advanced technologies available in the world today.

Who is VLI?

At VLI, we have been supplying specialist mining equipment and related services to the resources industry for more than 30 years. Over the years, we have undergone significant expansion as a result of strong organic growth, and a program of tactical amalgamations.

Why should you choose VLI?

Our commitment to research and development enables us to deliver high quality, innovative solutions for all types of mining, transportation, bulk materials handling, loading and drilling activities. VLI is a market leader in the supply of specialized equipment and allied services to coal mining and bulk materials handling industries.

What makes VLI a great company?

We maintain major manufacturing facilities in Australia, China and the USA, which enable us to distribute our technology and services to our customers across the globe. At VLI, we are an equal employment and advancement opportunity employer, and we understand that our team is what drives our success.

What makes VLI unique?

VLI is truly multinational, developing and manufacturing technology for the global market. Through our network of facilities around the world we are able to support our customer's operations wherever they may be.
