The Littlefoot Rig Custom Walking System is a scalable-capacity drilling substructure and backyard moving system. The Littlefoot's innovative design ...

derrick. Colonel Drake's rig was powered by a 6-horsepower steamboat engine. The walking beam, like a seesaw, rocked up and down on a central pivot. The derrick allowed the cable to ...

The Columbia Atlas and Hercules Oil Rig Walking System is an oil rig substructure moving system comprised of the Drill and Mud modules. This custom rig walking system uses 300- and 400 ...

We revolutionized trailer unloading technology with the Columbia Trailer Tipper, and continue to provide custom solutions to customers all over the world. Oilfield equipment includes rig ...

The Heart of the Pump: Understanding the Walking Beam in Drilling & Well Completion In the world of oil and gas extraction, the walking beam is a crucial component of the beam pumping ...

The Bigfoot Rig Walking System is a patented, scalable-capacity drilling rig and substructure moving system. The system employs the use of rollers paired ...

In the world of oil and gas extraction, the walking beam is a crucial component of the beam pumping unit (BPU), also known as a horsehead pump. This simple yet essential mechanism ...

An improved walking drilling rig is disclosed. The walking drilling rig includes a preassembled substructure that includes a first skid beam disposed parallel and spaced apart from a second ...

Compatible with a wide range of rig designs, our Rig Walking System can be adapted to both existing and new-built rigs. It consists of four units, which are ...

The StrongBack utilizes beams and cantilever platforms to balance loads on both sides of the rig while maintaining completion clearance in the rig cellar. It is ideally suited to upgrade an ...

A crank on the bandwheel's axle imparted up-and-down motion (via a pitman) to the walking beam, the other end of which was connected to the drilling cable by the temper screw. The ...

The Corbett rig could be built with a regular walking beam (as in the drawing) or with a segment walking beam. The rig shown, having only a 600 foot depth ...

A Chassis for Oil Rigs and More Entro Pony-Sub walkers are built from a set of boxes or frames designed
