

Walking drill rig demonstration

What is a rig walking system?

Rig Walking Systems Overview - Columbia's rig walking systems provide essential support to the oil and gas industry by offering efficient and safe methods for relocating heavy drilling rigs. These systems improve operational flexibility, allowing rigs to be re-positioned without disassembly, minimizing downtime and boosting productivity.

How much weight can a rig walking system move?

Columbia Industries offers a variety of rig walking system solutions capable of moving loads of up to 12 million pounds. To ensure our walking systems match your needs, we custom design each of our systems to meet the fabrication requirements of our customers' specific rig design criteria.

How does a walking rig work?

Walking Cycle: Lift cylinders raise the rig, then travel cylinders push the substructure along the center plank on rollers. The lift cylinders then lower the load and the travel cylinders retract for another pushing cycle. Steering adjustments are made by hydraulic cylinders while the load is off the rollers.

What is the Columbia rig walking system?

The Columbia Rig Walking System also allows multiple interconnected modules to be moved simultaneously. Columbia Industries offers patented wired or wireless remote control packages and autonomous walking (cruise control) to enable operators to be in the safest, most advantageous position possible while moving a rig.

How does the Columbia Kodiak rig walking system work?

Designed to move rig substructures, the Columbia Kodiak Cub Rig Walking System utilizes Hilman rollers paired with oversized lift cylinders and a low-pressure hydraulic system to lift and move the entire substructure. With a customizable fit designed to connect externally to either slingshot or box-on-box subs, the Kodiak Cub can attach to any rig.

What is the Bigfoot rig walking system?

The Bigfoot Rig Walking System is a patented, scalable-capacity drilling rig and substructure moving system. The system employs the use of rollers paired with lift cylinders and a safe low-pressure hydraulic system to lift the main walking beams that carry the rig weight.

ZHIGAO ZEGA ZGYX-453A All-in-one DTH drill rig performance demonstration. First in Mind, First in Choice!!! Model: ZGYX453 hole range: 90-138 mm DTH hammer: 3.5 / 4 inches ...

Check out this great time-lapse video of our Flex 3 Walking Rig! You can see how the rig can move freely around the site from different angles.

Walking drill rig demonstration

Character movement speed in demo Enjoyed the early part of the demo, but then got to the part where you get your first contract. Eventually gave up (didn't help that there was no way to save ...

A method demonstration is a teaching method used to communicate an idea with the aid of visuals such as flip charts, posters, power point, etc. A demonstration is the process of ...

Drilling is a common process used in various industries and everyday life. However, one frustrating problem that can occur during drilling is ...

This demonstration powerfully showcases the high-efficiency rotary drilling process of a modern mining DTH drilling rig in action. The robust machine seamlessly integrates rotary-percussive ...

Drilling is a common process used in various industries and everyday life. However, one frustrating problem that can occur during drilling is the "drill walking" ...

Cascade, with the Midwest Geoscience Group, performed a drilling demonstration for students and professionals in West Chester University. Cascade used sonic ...

The HW-500S Air-Lift Reverse Circulation Drilling Rig is a powerful, efficient drilling machine designed for a range of demanding projects. In our comprehensive demonstration video, we ...

Benefits of technology [0008]Certain technical advantages of the present disclosure include a walking drilling rig that conveniently and efficiently walks from well to well to support a multi ...

Browse Getty Images" premium collection of high-quality, authentic Walking Drilling Rig stock videos and stock footage. Royalty-free 4K, HD, and analog stock Walking Drilling Rig videos ...

i'm drilling a hole in a round part (304 stainless steel) about .2 deep with a standard drill. sometimes it'll stay consistent hole-to-hole, but every couple of parts it'll be a ...

This demonstration powerfully showcases the high-efficiency rotary drilling process of a modern mining DTH drilling rig in action. The robust machine seamlessly integrates rotary ...

High flexibility in rig travel Designed by T& T Engineering Services, the Lift & Slide walking system enables a rig to move forward, backward, and sideways. The ...

This module describes the basic job steps, potential hazards or accidents, and recommended safe job procedures for drill operation. It is designed for use in the training of drill operators and ...

Our Columbia Rig Walking Systems allow operators to move a loaded rig - including full fluids, backload, and all tools - from well to well. This eliminates the need to rig down for each move, ...

Walking drill rig demonstration

Browse 60+ walking drilling rig stock videos and clips available to use in your projects, or start a new search to explore more stock footage and b-roll video clips.

Walking rigs drill the same section of hole for several wells in a row. No single well is drilled from surface to total depth without interruption. When surface hole is completed on the first well, ...

GA Drilling - which attracted \$8 million in investment from Nabors Industries last year - has been working on a new tool to help drillers make ...

Walking systems, or "walkers" are machines that move very large loads, very precisely, in any direction. Walking draglines were some of the earliest ...

The Bigfoot Rig Walking System is a patented, scalable-capacity custom rig walking system for drilling rigs and substructure moving system.

With the advent of horizontal drilling and the subsequent expansion of multi-well pad designs in conjunction with the effort to have environmentally friendly drilling programs, walking rigs have ...
