What is a rig walking system?

Rig Walking Systems Overview - Columbia's rig walking systems provide essential support to the oil and gas industry by offering efficient and safe methods for relocating heavy drilling rigs. These systems improve operational flexibility, allowing rigs to be re-positioned without disassembly, minimizing downtime and boosting productivity.

How much weight can a rig walking system move?

Columbia Industries offers a variety of rig walking system solutions capable of moving loads of up to 12 million pounds. To ensure our walking systems match your needs, we custom design each of our systems to meet the fabrication requirements of our customers' specific rig design criteria.

What is the Bigfoot rig walking system?

The Bigfoot Rig Walking System is a patented, scalable-capacity drilling rig and substructure moving system. The system employs the use of rollers paired with lift cylinders and a safe low-pressure hydraulic system to lift the main walking beams that carry the rig weight.

What is the Columbia rig walking system?

The Columbia Rig Walking System also allows multiple interconnected modules to be moved simultaneously. Columbia Industries offers patented wired or wireless remote control packages and autonomous walking (cruise control) to enable operators to be in the safest, most advantageous position possible while moving a rig.

How many rigs does striker walk on?

STRIKER has developed and deployed our Well Runner(TM) walking system on multiple rigs. Currently in use on over 15 active rigs today, the development and deployment of this walking system (as well as additional upgrades) allowed these upgraded rigs to win contracts and have not stopped drilling since inception.

How does the Columbia Kodiak rig walking system work?

Designed to move rig substructures, the Columbia Kodiak Cub Rig Walking System utilizes Hilman rollers paired with oversized lift cylinders and a low-pressure hydraulic system to lift and move the entire substructure. With a customizable fit designed to connect externally to either slingshot or box-on-box subs, the Kodiak Cub can attach to any rig.
