

Weatherford drilling rigs

What is Weatherford drilling services?

Under the contract, Weatherford will deploy its Drilling Services portfolio, which includes a suite of technology that combines world-class services, real-time information analysis, and innovative drilling tools to maximize efficiency in any environment.

Does Weatherford add value to Aramco's drilling operations?

Deploying these service and technology offerings will add value to Aramco's drilling operations by minimizing OPEX, reducing risks, and optimizing production. Girish Saligram, Weatherford President and CEO, commented, "This award further showcases the value of Weatherford's comprehensive portfolio of drilling technologies."

What is the Weatherford Technical Data Handbook?

The technical data handbook compiled by Weatherford is an exceptional resource for those involved in drilling, production, completion, and workover operations. The comprehensive information provided in this handbook is a testament to the expertise and knowledge of Weatherford, and it is greatly appreciated by many oil and gas workers.

Why did Weatherford win a drilling Award?

Girish Saligram, Weatherford President and CEO, commented, "This award further showcases the value of Weatherford's comprehensive portfolio of drilling technologies. This award presents an opportunity to continue to serve our customers' evolving needs to meet the ever-increasing demand for the company's upstream drilling activities."

Who is Weatherford International?

Weatherford International was established in 1987. The company's roots date back to 1941 when Jesse E. Hall Sr. founded the Weatherford Spring Company in Weatherford, Texas. Weatherford today consists of the consolidation of more than 300 acquisitions since its establishment.

What is Weatherford securetrac E-ICV?

The Weatherford SecureTrac compact casing shoe system maximizes reservoir exposure while maintaining well integrity. By removing almost all the usual downhole electronics, the AMP e-ICV is a fast, robust ICV that allows you to control production or injection precisely and selectively.
