How much does a Seadrill West Aquarius cost?

The West Aquarius was previously contracted to BP for work in Canada from April to August 2018 at a day rate of \$260,000, according to Seadrill's latest fleet status update. West Aquarius was built in 2009 and has a maximum drilling depth of 10,000 feet.

Why did BP drill a 'west Aquarius'?

Because of its weight, the mud sinks rapidly in the water column to the sea floor. The synthetic based oil used in SBM was of low toxicity. The 'West Aquarius' was located approximately 330 kilometres southeast of Halifax. Drilling will not resume until BP Canada receives approval from the CNSOPB that it may proceed.

Will Seadrill take control of a rig?

Following its acquisition of Aquadrill, Seadrill President and CEO Simon Johnson said that Seadrill intends to take control of the former Aquadrill rigs at an appropriate time based on discussions with existing managers and the customers currently using these rigs. Ocean Energy Resources

Who manages Seadrill's tender-assist rigs?

Tender-assist rigs T-15, T-16 and West Vencedor are managed and operated by Energy Drilling Management. Johnson noted during Seadrill's Q4 2022 results presentation that the tender-assist rigs are not core units and that fleet composition is an active discussion for Seadrill.
