

West mira drilling rig manufacturer

What is a West Mira drilling rig?

Northern Drilling's West Mira, operated by Seadrill, is a sixth-generation harsh-environment ultra-deepwater drilling rig of Moss Maritime design. It is also the first modern drilling rig with a low-emission hybrid power plant with a battery energy storage system (ESS) in operation.

Will West Mira be the world's first hybrid drilling rig?

West Mira, a sixth-generation ultra-deepwater semi-submersible designed by Moss Maritime, will become the world's first modern drilling rig to operate as a hybrid with a diesel-electric power plant using lithium-ion energy storage solution (ESS). The solution consists of four converter-battery systems for a total maximum power of six megawatts.

Where is northern drilling's West Mira rig now?

The West Mira rig has left Bergen, Norway, and is heading for operations on the Wintershall Dea-operated Nova Field in the Norwegian North Sea. Source: DNV GL. Northern Drilling's West Mira ultra-deepwater semi-submersible rig has been awarded the DNV GL battery (power) class notation.

Who owns West Mira rig?

Oil and gas company Wintershall Dea has terminated the rig contract for the West Mira semi-submersible drilling rig, owned by Northern Ocean, managed by Seadrill. The news of the contract termination was shared Wednesday by Seadrill.

What is West Mira?

West Mira is an ultra-deepwater semi-submersible designed by Moss Maritime, operating a hybrid power plant using lithium-ion batteries as spinning reserve in dynamic positioning (DP) operations, and to supply power during peak load times.

Will Seadrill operate the West Mira rig?

Seadrill will operate the West Mira during drilling operations on the six Nova field wells. Wintershall contracted the rig for work on Nova in June 2018. Should all options be exercised, West Mira is expected to be contracted to Wintershall until the first quarter of 2022.

The offshore oil and gas industry is set for more hybrid battery power solutions with the announcement that a lithium-ion battery will be ...

Offshore staff HØVIK, Norway - Northern Drilling 's West Mira is the first rig in operation to be awarded the DNV GL Battery (Power) class notation. ...

Northern Drilling's West Mira is the first rig in operation to be awarded the DNV GL Battery (Power) class

West mira drilling rig manufacturer

notation. West Mira is an ultra-deepwater semi-submersible designed by ...

Fossil Energy - Drilling Northern Ocean announced a contract award for Deepsea Mira with TotalEnergies for work on a multi country drilling program, initially commencing in ...

The power plant that Siemens supplied for the West Mira drilling rig is a hybrid system that consists of four converter-battery systems, totaling 6-MW power available for DP ...

Northern Drilling's West Mira has become the first rig in operation to be awarded the DNV GL Battery Power class notation. West Mira is an ultra-deepwater semi-submersible ...

Offshore staff KASSEL, Germany - The semisubmersible West Mira has started drilling the first of six wells on the Wintershall Dea-operated ...

West Mira, a sixth-generation ultra-deepwater semi-submersible designed by Moss Maritime, will become the world's first modern drilling rig to operate as a hybrid with a diesel-electric power ...

The current position of DEEPSEA MIRA is at South Africa reported 107 days ago by AIS. The vessel is en route to VOLANS 1X, sailing at a speed of 7.4 knots ...

Offshore drilling rig contractor Northern Ocean expects its West Mira drilling rig to return to work by mid-April after it last week experienced an incident in which some production ...

Offshore drilling contractor Seadrill Limited has revealed that a termination notice has been received for the West Mira rig from Wintershall ...

It will be the world's first hybrid rig to operate a low-emissions hybrid (diesel-electric) power plant using lithium-ion storage technology, with ...

Northern Drilling's West Mira ultradeepwater semisubmersible rig has been awarded the DNV GL battery (power) class notation. The rig has ...

TotalEnergies Extends Contract for DeepSea Mira Rig in West Africa. TotalEnergies has exercised an option to extend its contract with Northern Ocean for the use ...

In 2019, the rig company Northern Drilling transferred its two semi-submersible rigs for rough waters, 'West Mira' and 'West Bollsta', into a new company named Northern Ocean. It is ...

Global energy giant TotalEnergies has exercised a contract extension option with Northern Ocean, further cementing its longstanding relationship with the Norwegian drilling ...

West mira drilling rig manufacturer

West Mira is an ultra-deepwater semi-submersible designed by Moss Maritime, operating a hybrid power plant using Lithium-ion batteries as ...

Northern Drilling bought the West Mira rig from Hyundai Heavy Industries after Seadrill had canceled the contract due to the yard's inability to deliver the rig on time.Northern ...

TotalEnergies has exercised an option as part of the contract with Northern Ocean for its DeepSea Mira semi-submersible rig, extending its stay ...

BlueVault(TM), Siemens advanced lithium-ion battery-based solution, will be installed on Northern Drilling Ltd.'s West Mira offshore drilling rig that ...

Energy Dais presents the most comprehensive list of the top Drilling Rig manufacturers in India, Middle East, USA & Canada. Choose from a list of 50+ ...

Deepsea Mira is a high specification, 6th generation dynamically positioned/moored harsh environment semi-submersible rig, managed and ...

West Mira is a sixth-generation, ultra-deepwater semi-submersible designed by Moss Maritime and will be the world's first modern drilling rig to operate a low-emission hybrid ...

Offshore drilling rig contractor Northern Ocean expects its West Mira drilling rig to return to work by mid-April after it last week experienced an ...

Travis Smithard, CEO of Rhino, commented: "We are pleased to partner with Northern Ocean and utilize the Deepsea Mira rig for the drilling of the Volans-1X exploration ...

West Mira, a sixth generation ultra-deepwater semi-submersible drilling rig, will be capable of drilling wells up to 40,000 feet deep in up to ...

Energy giant TotalEnergies has renewed its offshore drilling contract in West Africa, further solidifying its presence in the region. The company exercised an extension option for ...

TMG Manufacturing is located in Tampa, Florida and in Costa Rica, where we manufacture our quality line of drill rigs, compaction grouting and underpinning products and other geotechnical ...
