What type of drilling rig is a crawler rig?

Open-pit crawler-type down-the-hole drilling rig is a classic model drilling machine. This type of drilling rig has an electric system, with high-quality engines and motors. There are diesel engines for diesel and electric motors, and the power system can operate independently and can be switched at will.

How long did it take to drill a 12,000 ft hole?

The original estimate for completion of a 12,000-foot hole was 30 days using the conventional rotary technique, which was reduced to 13 days using the DTH method. Before DTH was used, drillers would typically case the vertical portion of the well and convert to rotary drilling to drill at a tangent.

What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.
