Why should you choose Huitong Xinda rotary screw air compressor?

Huitong Xinda engineers the highest quality rotary screw air compressors that enable us to build a better, more efficient future. Our screw air compressors have a 100% duty cycle, delivering a reliable, consistent stream of compressed air when you need it most.

What is a rotary screw air compressor?

A rotary screw air compressor is a reliable, efficient form of air compression technology that uses rotating helical screws to compress air. The compression process is relatively straightforward. A quantity of ambient air comes in through a valve and is trapped in the compression chamber between two helical rotors that interlock.

Does Quincy Compressor manufacture rotary screw air compressors?

Quincy Compressor manufactures a full line of industrial-sized rotary screw air compressors built to meet the demands of your business. Check out the full line of rotary compressors below. Click a button below to navigate to that section on the page:

How do rotary screw compressors work?

An oil-flooded system, the more common type of rotary screw compressor, fills the space between the helical rotors with an oil-based lubricant, which transfers mechanical energy and creates an air-tight hydraulic seal between the two rotors. The atmospheric air enters the system, and the interlaced screws push it through the compressor.

What is a QGS air compressor?

The QGS product line includes 5-30 horsepower belt screw air compressor models that include a long-life V-belt drive, high-efficiency intake filter and a robust TEFC motor. The standard quiet enclosure is designed to reduce vibration and noise levels. The eight-thousand-hour premium synthetic fuel features a low oil carryover.

What is a qgsv rotary screw variable speed compressor?

The QGSV series of rotary screw variable speed compressors are available from 5-50 hp. QGSV 10-50 hp units include direct drive transmission for energy savings & reduced maintenance cost. This unit includes options for tank mount and an integrated dryer configurations. Units are available at 175 PSI (QGSV 5-10 150PSI).
