What air compressor fittings does Tech Africa offer?

Tech Africa offers a range of air compressor fittings, including air hoses, male and female couplers, and air connectors. Tech Africa is proud to offer unrivaled after sales services on all their products.

What is an air compressor used for?

Air compressors are used for several applications, including inflating car tyres, spray painting, and pressure washing. They convert fuel into potential energy stored as compressed air using petrol and diesel engines. The storage tank's size determines the volume of air that can be stored and how long the air compressor will run.

What types of air compressors can I use for my workshop?

We have a wide range of air compressors, air generators and air tanks that you can use to create your workshop. From small portable units to larger heavy-duty models, there's something for all garage or workshop sizes.
