

Zpec drilling rig

What is ZPEC rig?

The rig is developed by ZPEC apply to low temperature area adopts low temperature resistant and high strength wheel and rail materials. All components are installed on heavy rail, the rig is moved by hydraulic cylinder push, which is suitable for cluster well operation. Product features:

Is ZPEC drilling a oil well in Iraq?

China's Zhongman Petroleum and Natural Gas Group Corp.,Ltd. (ZPEC) has reportedly started drilling its first oil well in Iraq's eastern province of Diyalaon Tuesday. The mayor of Qazaniya told Xinhua that it is more than fifty years since an oil well was drilled in Diyala province. Mazin al-Khuzaiie added that [...]By John Lee.

How many oil wells will ZPEC drill?

Under the 28-month contract,ZPEC will drill 66production oil wells at the Lukoil-operated field. Current production capacity at West Qurna II is [...]By John Lee. Russia's Gazprom Neft has picked a contractor to drill six production wells in the Badra field in Iraq which it operates.

What are the requirements of ZPEC rig?

Meet the requirements of -55? -- +40? operating environment. The rig is developed by ZPEC apply to low temperature area adopts low temperature resistant and high strength wheel and rail materials. All components are installed on heavy rail,the rig is moved by hydraulic cylinder push,which is suitable for cluster well operation.

What is ZPEC pawl slide rail polar rig?

ZPEC pawl slide rail polar rig apply to Yamal regionwith polar low temperature environment,ratchet slide double track layout,insulation shed modular integrated design,which can be moved along with the rig. The rig is designed as compact structure,modular disassembling and transportation. Product features:

What is a low-temperature drilling rig?

The new generation of low-temperature drilling rig, integrating innovation, optimization and upgrading. It adopts a slide-rail type double-track moving structure. All modules of the drilling rig are placed on the track to meet cluster well operations.

The wellsites of ZPEC Rig 9 and Rig 17, which provide drilling engineering services for Schlumberger Changhe Oilfield, are located in the mountains of Zichang City, Yan'an.

ZPEC 2000HP Workover Rig VFD possess excellent driving properties in desert, mountain and other impassable terrains. Their exceptional mobility, stability, ...

Since the beginning of this year, in order to speed up the work of increasing reserves and production in the

Zpec drilling rig

Aksu Oilfield, ZPEC Drilling Company mobilized 7 rigs. They scrambled and ...

The driller's cabin is designed and manufactured according to the general technical requirements of the drilling (workover) rigs, and it integrates the control system and display system.

ZPEC has core businesses covering oil and gas exploration and development, integrated drilling and completion engineering technology services, which drives the development of high-end ...

On April 10th, Well YB152-D04, drilled by ZPEC Rig 17, was successfully completed in 12.58 days, which was 7 days ahead of the designed period. This achievement broke the previous ...

At 4:30pm on January 13th, Iraq local time, along with the roar of the drilling rig, ZB-487 Well was successfully drilled by the Team 27 of the ...

Trailer-mounted Drilling Rig The Drilling Rig is divided into three moving units: the drilling rig, mud pump devices, and the power system. Each unit can be moved by motor tractors through the ...

Offline drilling is more convenient, saves time and effort, and greatly improves safety. Wang Changrong, the President of ZPEC Equipment Research ...

On April 17th, ZPEC Rig 28 received a Commendatory Letter from Schlumberger, the Party A of the ENI Project, highly affirming the excellent ...

On the afternoon of September 8, 2021, the leaders of ZPEC Drilling Company sent their congratulations to ZPEC Rig 13 and awarded ...

In 2017, ZPEC entered the Russian market through drilling and completing 61 horizontal wells with a cumulative footage of 171,117 m by using a total of 6 drilling rigs.

Product Features · Power system utilizes international famous engines and hydraulic transmission boxes. · The mast is front-open and two-section telescopic front-inclined type, which is ...

On the afternoon of September 8, 2021, the leaders of ZPEC Drilling Company sent their congratulations to ZPEC Rig 13 and awarded them 30,000 RMB in recognition of ...

The independently developed ZMOR350 intelligent offline drilling rig is the first in China, representing a new concept of fully automatic drilling equipment, leading similar domestic ...

ZPEC can provide customized drilling rigs according to the customers' requirements. Successful case: Hydraulic Cluster Drilling Rigs According to the special needs from the world's second ...

Zpec drilling rig

Today, we visited the ZPEC 27 Drilling Rig located in the Zubair Oilfield, where drilling operations for well ZB-584 (12 1/4" section) are being conducted under ...

ZJ40DBT electric variable-frequency trailer drilling rig, manufactured by ZPEC Kunlun Equipment Company, will be used for this drilling operation. At present, the drilling rig ...

At 4:30pm on January 13th, Iraq local time, along with the roar of the drilling rig, ZB-487 Well was successfully drilled by the Team 27 of the ZPEC ENI Project in the Zubair Oil ...

This marks ZPEC's entry into the Saudi drilling engineering market, which is recognized as the highest threshold in the world. This is a historic breakthrough as, until now, ...

China's Zhongman Petroleum and Natural Gas Group (ZPEC) and BP Iraq have signed an integrated drilling service contract for 15 wells at ...

Among them, ZPEC Rig 14 performed particularly well, all the team's cadres and employees strengthened the measures with the belief of "starting with a sprint, ...

On October 26th, the 70DB Drilling Rig, designed and manufactured by ZPEC for Nigeria's Charlvon Limited, successfully shipped from ZPEC's Shanghai Ligan base. In ...

At present, ZPEC Rig 43 has completed the derrick installation and commissioning work at the JNAB-821 Well in the HZEM Work Area, and ...

ZMOR350 offline rig is a new generation of intelligent drilling rig independently researched and developed by ZPEC. The drilling rig adopts high-efficiency pipe handling system, and through ...

At 10:00am on July 12th Iraq time, EBSZ-4 was spud in by ZPEC Rig 23. It was first mobilized on June 26th with the rig up and derrick successfully completed on July ...
